Los Angeles, CA

PROFESSIONAL EXPERIENCE

Software Engineer *March 2022 - Current*
Gap Inc. *Los Angeles, CA (Remote)*
- Led architecture and development of Java Spring Boot applications handling the flow of inbound and outbound transactions between client and internal services.
- Developed and integrated a proprietary package to distribute reusable components across micro-frontend teams, improving developer efficiency.
- Migrated operational alerting from Splunk to GCP, designing real-time monitoring that improved health and performance visibility.
- Ensured code quality by implementing fixes raised by SonarQube, reducing the risk of memory leaks and undefined behavior.
- Facilitated agile meetings, collaborating with developers, product owners, and stakeholders to ensure alignment on business goals.

Software Engineer Intern *May 2021 - March 2022*
PassiveLogic *Salt Lake City, UT*
- Contributed to an Enyo-based application designed to apply machine learning techniques to innovate building management systems.
- Led architecture and implementation of data visualization for internal physics-based equipment models.
- Designed and implemented a local persistence data model to enable offline functionality using the browser's local storage.
- Collaborated with UI/UX designers to translate Figma designs and resolve application flow concerns.

PROJECTS

Pantree *Fall 2021*
- A cross platform Flutter application designed to help users manage common household items, create shared shopping lists, and provide dynamically recipe suggestions to the user based on what ingredients they have available.

TECHNICAL SKILLS

Languages: JavaScript, Java, HTML, CSS, SQL

Tools and Libraries: Git, Jenkins, Docker, Spring Boot, Splunk, Celigo, GCP, Azure, React, Jira

EDUCATION

University of Utah *August 2017 - December 2021*
B.S. Computer Science *Salt Lake City, UT*

ACTIVITIES

GapTech Hackathon *2022, 2023*
- Participated in cross-functional hackathon event focused on innovating customer engagement across our brand portfolio.
- Collaborated with UI/UX designers, and product managers to develop a web interface that filter and curate items based on a customers individual style.

CodeWeek Mentorship Program *Fall 2017*
Learning Facilitator *South Jordan, UT*
- Participated in a JATC/SLCC event to visit elementary schools throughout Salt Lake City.
- Provide young minds the opportunity to learn basic programming concepts and encouraged the next generation to pursue fields in STEM.
